

JAMMAZI MOHAMED KHALIL

Java Full-Stack Consultant

+216 50 622 927 | khalil.jammazi366@gmail.com | khalil-jammazi.vercel.app | linkedin.com/in/khalil-jammazi | Tunis, Tunisia

PROFESSIONAL SUMMARY

Front-End / Full Stack Developer with 4+ years of experience designing responsive web applications and integrations for international clients in telecommunications, banking and retail. Strong expertise in Angular, React, Vue.js, TypeScript, JavaScript, REST APIs and Spring Boot. Experienced in high-traffic portals, micro-frontends and back-office applications while collaborating with distributed teams across France, Morocco, Burkina Faso and Libya. Currently developing a multilingual AI- and RAG-powered customer support platform.

TECHNICAL SKILLS

Front-End: Angular 9+, TypeScript, RxJS, React.js, Redux, Vue.js, Nuxt.js, Next.js, JavaScript ES6+, HTML5, CSS3, Bootstrap, responsive design, micro-frontends

Back-End and APIs: Java, Spring Boot, Node.js, Express.js, Python, ASP.NET C#, Laravel, REST APIs, GraphQL, microservices, JWT, OAuth2/OpenID Connect fundamentals

Data, AI and DevOps: Elasticsearch, Redis, MongoDB, MySQL, PostgreSQL, SQL Server, Firebase, Oracle PL/SQL, RAG, semantic search, Hugging Face, ONNX Runtime, Groq API, Docker, Git, Jenkins, CI/CD, Liferay DXP, Keycloak, Qlik Sense

PROFESSIONAL EXPERIENCE

Java / Liferay Developer | Keyrus - ATIB Bank, Libya | 2026

- Lead technical contact for the ATIB.LY redesign, coordinating with stakeholders and business analysts.
- Developed a Spring Boot microservice to synchronize third-party financial data through REST APIs; delivered Liferay extensions, themes and CSP configuration.

Front-End Developer - Nuxt.js / Vue.js | Keyrus - Maxit Orange Control Tower | 2025

- Contributed to Max It, a platform serving 8 Orange subsidiaries and targeting up to 80M users; built responsive Nuxt.js/Vue.js back-office modules using Domain-Driven Design.
- Designed micro-frontend integrations and implemented Keycloak authentication, localization, roles and permission management while collaborating with distributed teams.

Full Stack Developer - React / Liferay DXP / Java | Keyrus - Maroc Telecom | 2022 - 2025

- Redesigned iam.ma, a portal serving 30M+ monthly visitors, and improved Lighthouse performance by 340%.
- Built reusable React components, personalized Liferay themes/templates and Java/JSP integrations for portal and e-commerce modules; connected the CMS to back-end services and 50+ REST APIs.

Full Stack Developer - POS System | Keyrus - Orange Retail | 2024 - 2025

- Designed REST APIs for real-time transactions, inventory and payments; performed integration testing and debugging and supported Jenkins CI/CD pipelines.
- Developed checkout and stock-management workflows while collaborating with front-end, back-end and business teams to ensure reliable integrations.

Angular / Spring Boot Developer | Keyrus - Orange Burkina Faso | 2022 - 2025

- Built a back-office application with role-based access control, administration tools and back-end service integrations.
- Created reusable Angular components and integrated Spring Boot APIs, forms, validation rules and user permissions.

Front-End Developer - BI Dashboard | Keyrus | 2022 - 2025

- Embedded Qlik Sense visualizations into a web interface through the Mashup API.
- Designed responsive dashboards and interactive filters to simplify analysis and business KPI monitoring.

Full Stack Developer Intern | ESPADA | Feb. 2022 - Jun. 2022

- Developed a Laravel/jQuery/Bootstrap ERP and Talend/Chart.js dashboards for business reporting.
- Modelled MySQL data, implemented management modules and created ETL jobs to feed reporting indicators.

Web Developer Intern | Hammamet Informatique Services | Jun. 2021 - Aug. 2021

- Created a React.js/Firebase delivery platform and integrated automated notifications through the WhatsApp Business API.
- Developed order-tracking interfaces, user authentication and real-time Firebase data synchronization.

PROJECTS

AI/RAG Customer Support and Semantic Search Platform | 2026 - In Progress

- Designing a multilingual platform with document ingestion, chunking, embeddings, vector search and contextual answer generation in Arabic, French and English.
- Building Spring Boot/Python pipelines with Elasticsearch and Redis; integrating Groq API, Hugging Face and ONNX Runtime; automating ticket categorization and prioritization; containerizing with Docker.

Car Rental Web Platform | Dec. 2020 - Jan. 2021

- Built with React/Redux, Node.js, Express.js and MongoDB, including vehicle search, JWT authentication, Stripe payments and an administration dashboard.

Library Management System | Mar. 2021 - Apr. 2021

- Developed a Java Swing/MySQL desktop application using MVC architecture to manage books, members, loans and due dates.

EDUCATION, CERTIFICATIONS AND LANGUAGES

Engineering Degree in Computer Science | ESPRIT, Tunis | 2022 - 2025 **Bachelor's Degree in Computer Science** | ITBS, Nabeul | 2019 - 2022

Certifications: MuleSoft Developer - Salesforce (2023) | Database Foundations - Oracle (2021) | Java Foundations - Oracle (2021)

Languages: Arabic - Native | French - Full Professional Proficiency | English - Full Professional Proficiency
